RHODODENDRONS.

After many years' experience in the propagation of these most desirable plants, we have tested a large number of varieties originating in Europe as to hardiness in this country, and with a select few of our own hybrids, all grafted plants, offer the following list of hardy kinds which represent also the most desirable colors; a longer list would only confuse the purchaser. It must be remembered that there is a diversity of growth among the varieties of the same age and price, and that it is impossible to execute orders for plants of a uniform height. If certain varieties from this list are sold out upon receipt of order, we will select others representing their color, unless otherwise instructed.

ALBUM ELEGANS , very large white.	} Plants with buds, \$75.00
BICOLOR , dark rose.	
GENERAL GRANT , rosy scarlet.	
GRANDIFLORUM , (Parsons), rosy crimson.	
HERBERT PARSONS , large lilac blush.	
PURPUREUM GRANDIFLORUM , large dark purple.	} per 100.
